Parker Motion Controller - PAC

Overview

Description

The Parker motion Controller PAC is a PLC basing on ARM with integrated CODESYS. This programmable motion controller combines machine logic, real-time motion control and visualization into a standard based, performance driven, fan-less and easily mountable din rail solution.

The controller matches the PACIO modules, which can be attached directly to form a mechanically and electrically homogenous unit. In combination with these modules, it can take over complete machine control.

Equipped with a native, real-time EtherCAT bus, a modular interface slot, standard Ethernet and USB ports plus a built-in SD-card slot and the supported fieldbus options Profinet Slave, EtherCAT or EtherNet/IP the controller can be easily integrated and is suitable for a wide range of applications.

Programmed with CODESYS, efficient and powerful control systems can be designed based on IEC61131-3 and PLCopen motion standards. Offering the OPC UA server the controller is the perfect device for industry 4.0 communication.

Our PAC motion controller is available in two different versions:

PA120 and PAC340.

PAC120 is suitable for many motion applications.

For higher demands on performance and memory the PAC340 is available. With its four processor cores, it also supports the CODESYS multicore feature.

General	PAC120
Function	Mini-IPC with integrated CODESYS SPS and EtherCAT master function for I/O modules systems PACHC and PACIO
Housing	Aluminium strap, plastic
Protection class	IP20
Mounting	35 mm DIN rail
Operation temperature	0 °C...+55 °C

Common Features

- Fan-less ARM processor technology
- Ethernet and EtherCAT
- Fieldbus options: EtherCAT, Profinet, EtherNet/IP, Modbus
- OPC UA server
- CODESYS V3.5
- CODESYS WebVisu
- CODESYS SoftMotion
- IEC61131-3 programming
- PLCopen motion control
- Web configuration tool
- SD card slot and USB interface
- Expandable with Parker PACIO modules
- DIN rail mounted

General	PAC340
Function	CODESYS PLC Motion Controller with a wide range of data interfaces
Housing	Aluminium strap
Protection class	IP20
Mounting	53 mm DIN rail
Operation temperature	Ambient operation temperature: (0 to +40) °C

Product Overview

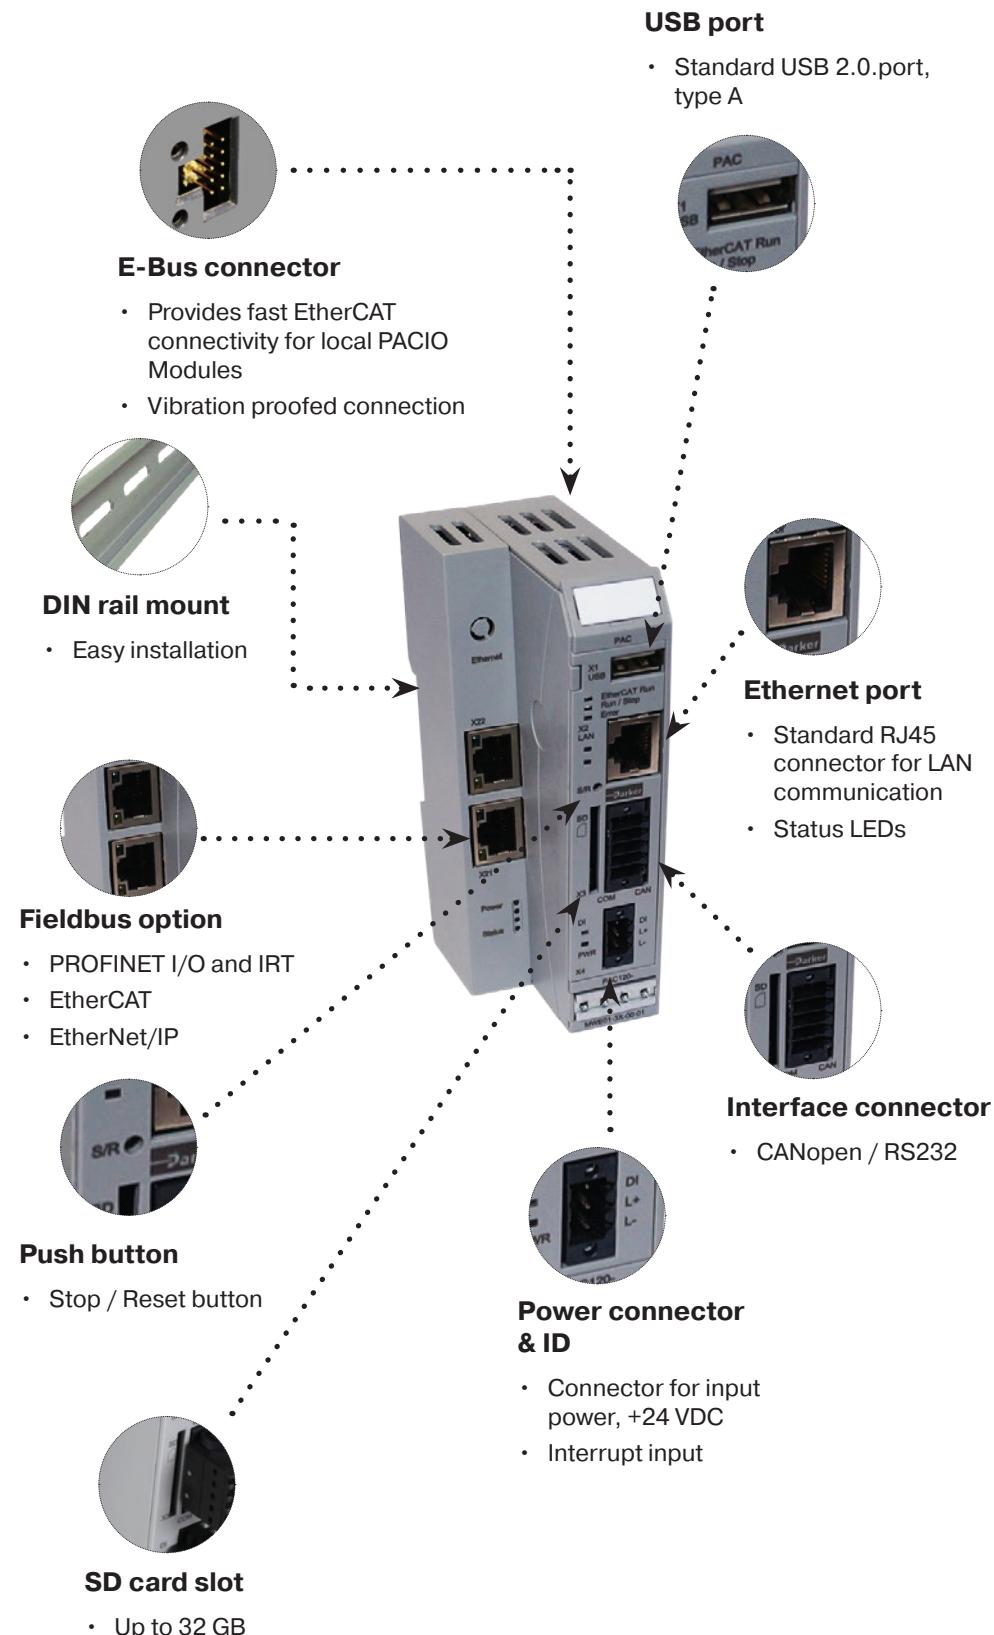

Designed to maximize efficiency while exceeding performance expectations, the Parker Automation Controller (PAC) is programmed with the well-established CODESYS, an Integrated Development Environment (IDE) and comprises the PAC I/O System. Together these elements provide a powerful, standards-based programmable package designed to tackle the most demanding applications. The PAC system consolidates machine logic, signal handling, advanced motion, and visualization.

I/O Modules

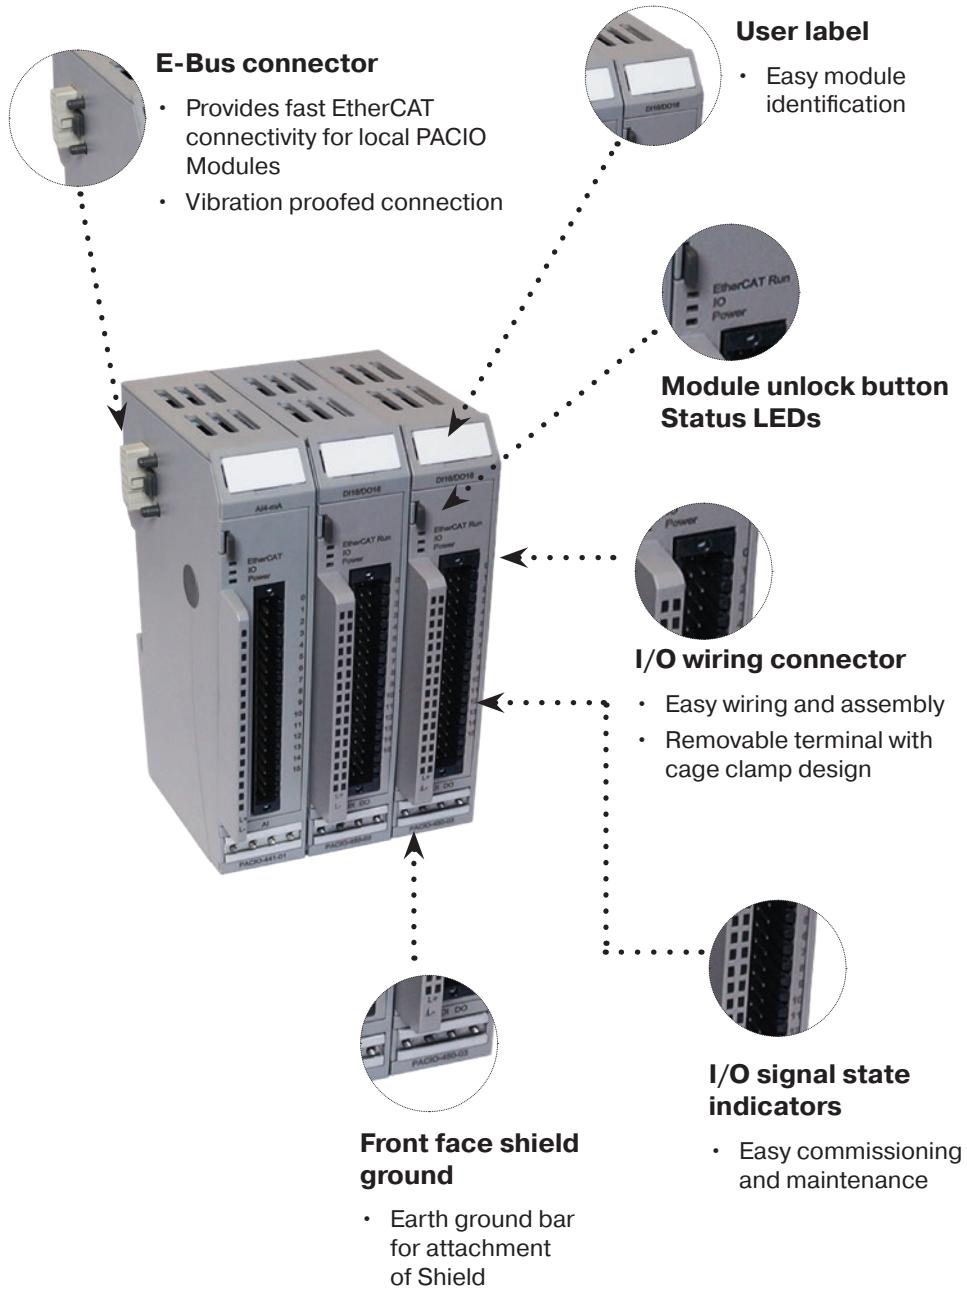

The PAC I/O System comprises a variety of modules for digital, analog, temperature signals, high-speed counters, and communication interfaces.

Software

CODESYS is the leading manufacturer-independent IEC 61131-3 automation software for engineering control systems. It's a software platform for industrial automation technology. The core of the platform is the IEC-61131-3 programming tool "CODESYS Development System". It offers practice-oriented, integrated solutions for the convenient configuration of automation applications. Everything is integrated in a single user interface

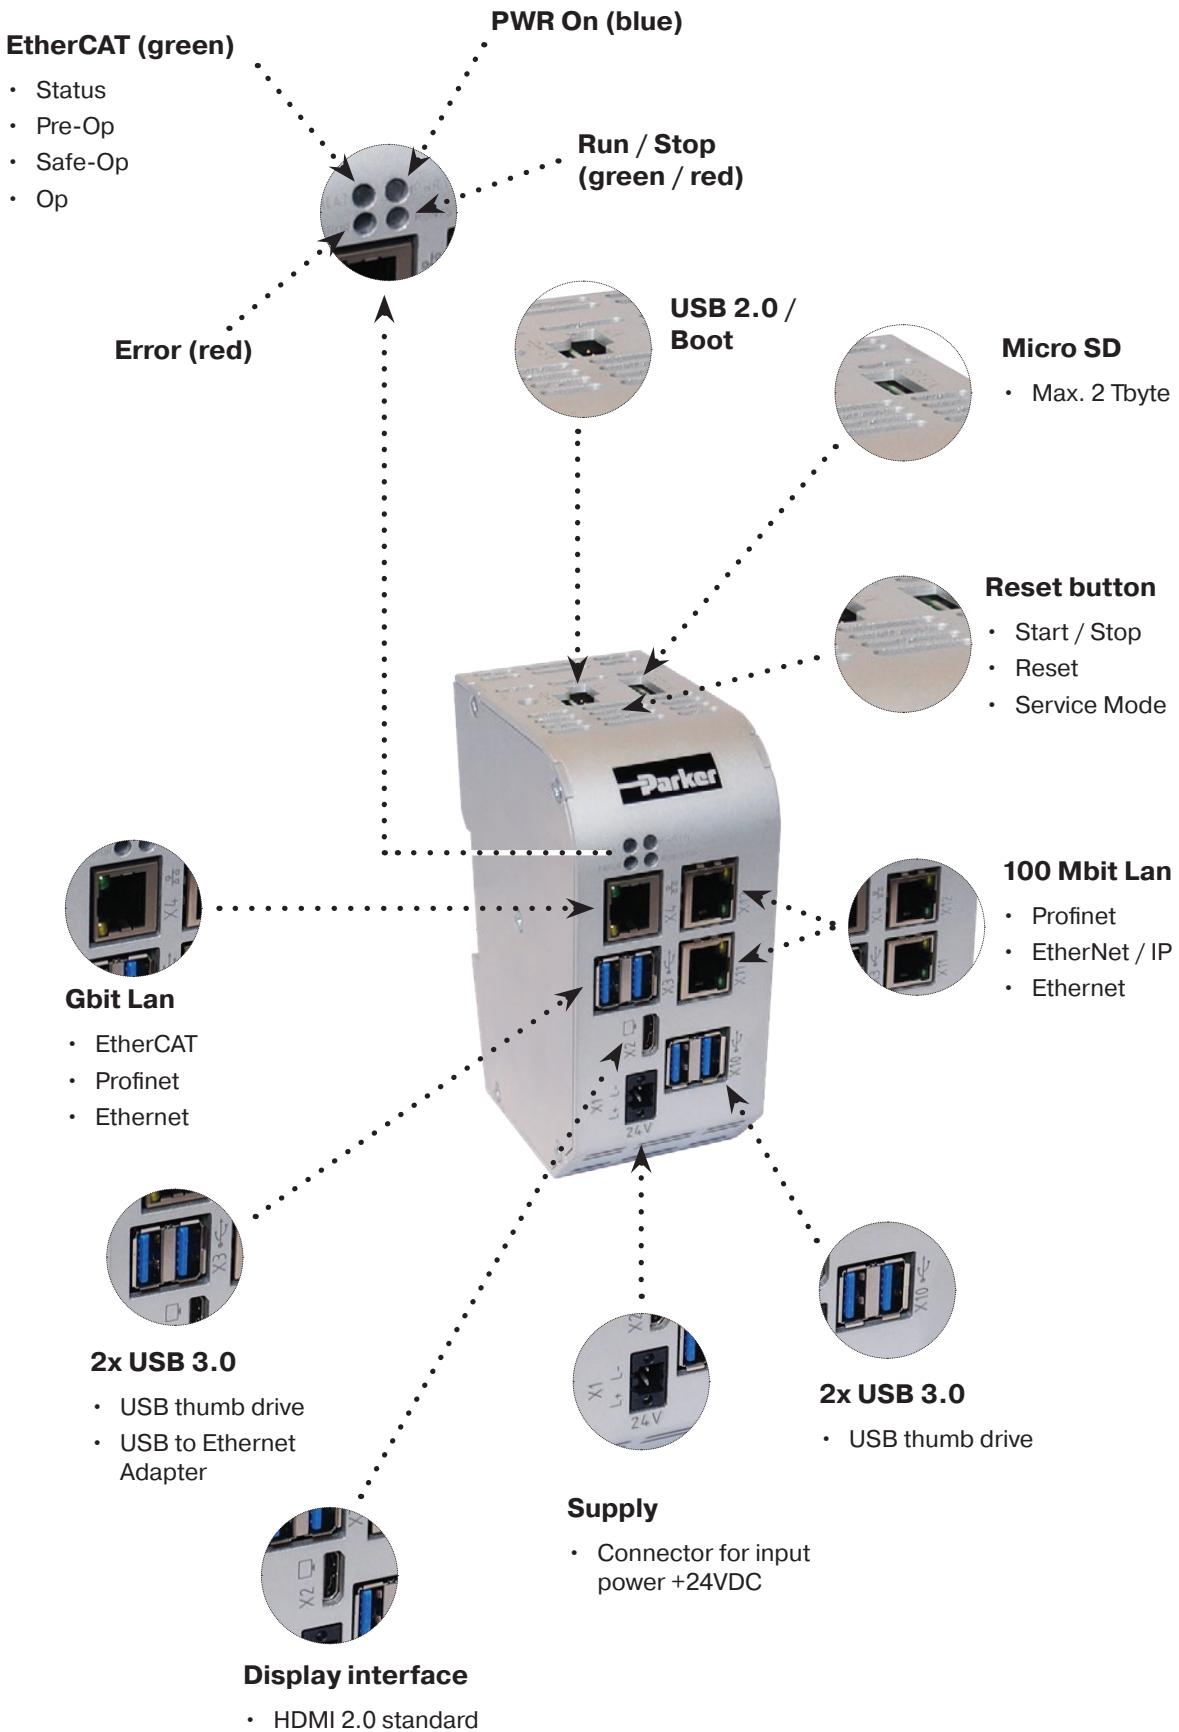

Engineers can work smarter, more efficiently and more effectively by choosing from the five IEC standard programming languages to optimize for an application, by using industry standard PLCopen Motion for motion control programming, deploying to the powerful simulation runtime for faster development and using online variable watch and trending for logic analysis.

Parker Remote I/O System PACIO

The PACIO System comprises a variety of modules for digital, analog and temperature signals as well as communication interfaces. The modules connect directly to the controller via the built-in EtherCAT bus for local architectures and are extended to remote locations via the extender and bus coupler modules, thus supporting both local and distributed I/O architectures. PACIO communicates natively on the EtherCAT bus, therefore it provides the full functionality and throughput of high-speed EtherCAT to meet the most demanding real-time requirements. For further information see Parker catalogue file for the PACIOs.

Module Type	Part Number	PACIO Description
Interfaces	PACIO-400-00	PACIO EtherCAT Bus coupler, 3 A
	PACIO-400-02	PACIO Extender 2 Port (EtherCAT I/O extender)
Accessories	PACIO-411-00	Power Distribution Module (distributes 0 VDC or 24 VDC attached at pins L1 or L2)
	PACIO-412-01	PACIO Shield 2x8 mm
	PACIO-412-02	PACIO Shield 14 mm
Analog	PACIO-441-01	PACIO AI4-mA (4 single-ended analog input module), 12 Bit resolution
	PACIO-441-02	PACIO AI4/8-VDC (4 differential/8 single-ended analog input module), 13 Bit

	PACIO-454-01	PACIO Counter/Enc (encoder counter module)

Safety Controller

Safety PLC is a module intended to be integrated in EtherCAT® networks with Parker Motion Controller. Acting as the FSoE master, it is able to address any FSoE slave including safety I/Os, motion controllers and other FSoE equipment. The Safety PLC meets the requirements of IEC 61508 SIL3 and DIN EN ISO 13849 PLe. The main controller's CODESYS environment and the EtherCAT link are used for programming.

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374
